

**Course:** Advanced Placement Biology

**Teacher:** Alistair Eggo

**Unit:** Endgame

**Date:** 03/30/2020

**Duration:** 5 Weeks

**Description:**

I will be working closely with the student in the coming weeks to finish their preparation for the AP exam. As a result of COVID-19, some content has been cut from the exam, resulting in a length decrease from 3 hours to 45 minutes. We will thus shortly finish our unit on Metabolic Processes (occurring simultaneously in Bio 11) and will begin test preparation. The best preparation for your child will be writing practice exams. Given the extremely short examination this year, class time will focus on the necessary skills needed to ace the exam. I am confident that the student has all the skills directed by the curriculum, but unfortunately not all of these will be testable. Please contact me directly with any questions or comments.

**Required Resources**

The student will need access to:

- AP Classroom
- YouTube
- Textbook (in folder)
