

Alcuin College, an independent K-12 school, promotes innovative, active learning where the Arts, Maths and Sciences are brought together in well-rounded discussion. The result? A solid grounding for lifelong learning and critical thinking that equips our students for life. Alcuin is fertile ground for curious minds who need the right attention to blossom.

We will always cherish our uniquely small classes and tailored learning

Personalized learning in small classes is what makes us unique, and we treasure its benefits for students, teachers, and parents. As we grow and expand our offerings, we remain committed to these values.

Two campuses, but united

We've been privileged to grow as more families join the Alcuin community. Within the next school year, we enter an exciting phase of our journey that will see us expand to a new facility. The youngest grades will continue to enjoy the benefits of the St. Georges campus, while the rest of the school will move to the new building on Mahon. Despite having two campuses, we are committed to maintaining a sense of "one school". We've been blessed with a warm, supportive culture where everyone knows everyone else. We want to nurture this going forward.

Two strategic priorities over the next three years

Building athletic capacity

Physical team sports offer significant benefit to students. After understanding where our students' athletic interests lie, we will seek partnerships with other schools to field teams. We also aim to increase our participation in the North Shore Secondary Schools Athletic Association (NSSSAA).

Growing our community

In order to make a deep connection between school learning and real life, Alcuin partners with local businesses, community leaders, and other groups that reflect our diverse society. These connections allow our students opportunities to learn from, and learn in, a variety of environments in the course of their education. We will focus on initiating and building stronger relationships with businesses, groups and communities.
